Niger powersafe sbs 110

Overview

What is a powersafe SBS 110 battery?

The EnerSys PowerSafe SBS 110 battery range utilizes unique and proven technology to provide a superior range of valve-regulated batteries with an extended service life in compact and energy dense configurations.

What battery sizes are available for powersafe® SBS batteries?

PowerSafe® SBS batteries are available in both 12-volt front-terminal and 2-volt OPzV and OPzS DIN container sizes, and an extensive range of Ampere-hour (Ah) capacities, providing flexibility to fit any setup.

What is the maximum operating temperature of a powersafe SBS battery?

The maximum operating temperature of the PowerSafe SBS battery series can be extended to 80°C via an optional metal jacket. Features Specialist Power Systems are an approved sales partner to EnerSys in the UK with expert technical knowledge.

Are EnerSys SBS batteries a good choice?

The EnerSys® range of PowerSafe® SBS batteries continues to offer unrivalled choice and performance in compact and energy dense configurations. PowerSafe SBS batteries are manufactured to the highest international standards and are ideal for reliable use in all wireless and fixed-line communication applications.

Why should you choose a powersafe SBS battery?

Smaller than the competition, the design of the front terminal series offers improved flexibility where space is limited and makes installation and maintenance easier and faster. PowerSafe SBS batteries are designed to cope with raised temperatures and harsh environments.

Where are powersafe® batteries marketed?

PowerSafe® products are marketed under the SuperSafe® brand in the following specific countries - India, Indonesia, Malaysia, Singapore, Thailand, Australia and New Zealand. Featuring advanced Thin Plate Pure Lead (TPPL) technology, PowerSafe SBS batteries deliver long life, high energy density and superior shelf life for telecommunications.
