

European Solar Energy Storage

Nigeria beyond battery

Overview

Where are Beyonder batteries made?

Beyonder has established a battery centre with research and development, laboratories, production testing and prototype production in Stavanger, Norway. The company will open its first separate, full-scale commercial production facility at a suitable location in the Stavanger region in 2024.

What is Beyonder battery technology?

Beyonder is a battery technology company that has developed the next generation eco-friendly and energy efficient batteries. Produced with clean energy and energy-efficient methods, our batteries have the smallest environmental footprint possible.

What is Beyonder's hybrid battery cell technology?

Beyonder's hybrid battery cell technology is a more cost-effective and sustainable way to supply electric power for renewable energy grids, transportation and offshore energy infrastructure where high power and fast charging is needed.

Is Beyonder LiC a good battery?

Beyonder's LiC is durable and suitable even for the Nordic low-temperature environment. The LiC's high-capacity silicon anode provides a high specific energy. The use of a wood-derived activated carbon cathode enables the LiC to operate at higher specific power, with greater durability compared to Li-ion batteries.

 Beyonder CEO Svein Kvernstuen explains more about the plans for an international battery adventure in Stavanger Aftenblad, June 16: "This is ...

Beyonder AS receives offtake agreement of 76MWh of ...

Beyonder supplies BePowered battery products that offers excellent power properties with extended cycle life in addition to excellent thermal properties. Beyonder has developed eco-friendly and energy efficient batteries that can be fully charged in 12 minutes and recharged more than 10.000 times. This advanced technology aims to reduce the

Educating new battery experts in Norway! -- Beyonder

Beyonder and the other Norwegian battery players have raised this concern several times in the past couple of years and have together decided to take an active role in solving the challenge. By working together with the whole battery value chain, we managed to create a national focus on how to address these issues.

Beyonder's battery cell technology is a game-changer

Beyonder's hybrid battery cell technology is a more cost-effective and sustainable way to supply electric power for renewable energy grids, transportation and offshore energy infrastructure where high power and fast charging is needed. Moreover, compared with standard Li-ion cell production, fewer chemicals and less energy are used to

Beyonder Unveils Sustainable Li-ion Battery for Industrial Use

The key features of Beyonder's Li-ion battery include fast charging, exceptional longevity, and

sustainable chemistry. With a full charge or discharge time of 10-12 minutes, the battery ensures swift access to energy. Its lifespan of over 10,000 cycles outperforms conventional batteries, promising durability and reliability.

Beyonder and Bergen Carbon Solutions sign LOI to enhance the ...

Beyonder and Bergen Carbon Solutions ("BCS") have signed a letter of intent (LOI) to establish a local value chain of green carbon for Beyonders BePowered product- and development work for next generation battery chemistries. - Securing local access to sustainable carbon materials for our batteries are important, and the BCS novel technology to develop a ...

Norwegian state enterprise Siva acquires the office building of battery ...

The sale further strengthens Beyonder's ability to raise capital and is set to enhance Norway's position in the European battery value chain. Unlocking capital for Beyonder AS Through Siva's investment in the building, Beyonder ...

Beyonder have signed one of the best battery experts that has ...

Finally, Beyonder has found their Chief Technology Officer, and his name is Dr. Han Ho

Lee. - This is a huge milestone for us, says Beyonder's talent acquisition director, Runar Austrheim. - The entire world is now competing for world champion battery experts like this, and this appointment is p

Beyonder and Bergen Carbon Solutions signed LOI to establish a ...

The objective of the cooperation is to further establish and commercialize access to critical carbon materials for Beyonder`s BePowered products and the next generation battery chemistries. - Local and sustainable battery production will be key as EU's Critical Raw Materials Act (CRMA) will enhance the strategic importance for the battery producers to team ...

Beyonder Unveils Sustainable Li-ion Battery for Industrial Use

Rogaland-based company Beyonder has launched a commercial Li-ion battery designed

for industrial applications. This battery technology offers a sustainable and efficient ...

We want to meet the global need for eco-friendly energy

Beyonder's battery technology is produced using ecological materials such as renewable energy and sawdust. With its clever combination of a Li-ion cell and a Li-ion capacitor it perfectly suits many applications. The batteries are non-flammable and can be fully charged in two minutes and recharged up to 100 000 times, thus reducing the need for
