

## European Solar Energy Storage

# North Macedonia energy storage business models

## Overview

---

### What is North Macedonia's Energy Strategy?

Integration and security of energy markets: the Strategy is aiming to ensure that North Macedonia is even stronger integrated into European markets, protect today's levels of energy dependence and provide necessary flexibility for higher RES integration.

### Is North Macedonia a state-owned power company?

North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s. Austrian utility company EVN has been responsible for electricity distribution in North Macedonia since entering the market in 2006.

### How many power plants are there in North Macedonia?

The electric power production system in North Macedonia consists of two coal power plants with a total installed capacity of 825 megawatts (MW), several hydro power plants with a total installed capacity of 695 MW, one combined generation power plant, a heavy oil plant, a few solar power plants, a few biogas plants, and one wind power farm.

### Did North Macedonia change its energy regulations?

There were no major energy legislative changes, but North Macedonia continued to harmonize its energy regulations with the EU Energy Community's Third Energy Package (TEP). North Macedonia's state-owned power company was unbundled and partially privatized in the early 2000s.

### How much will ESM invest in North Macedonia?

Final bids are expected in the second half of 2022. The investment is estimated at \$640 million and will be crucial for balancing the electricity system. ESM owns and operates North Macedonia's only wind farm, a 36.5 MW park in the southern part of the country. It plans to increase capacity with two

separate 14 MW investments in the same area.

Will Macedonia re-open a dormant oil pipeline?

The pipeline and refinery have only been used for storage since 2013. The governments of North Macedonia and Greece are discussing re-opening the dormant oil pipeline.

### Europe: Rising battery storage markets

While the UK is a standout leader of the continent in terms of deployment figures, and arguably also sophistication of business models - as pointed out in a new study by Aurora Energy Research - tracking the European market is also becoming much more interesting, Darmani said. "There was maybe not as much to speak about a couple of years ago on the ...

### Hydrogen transport and storage: Update on proposed

...

The response from the Department for Energy Security and Net Zero ("DESNZ") set out a summary of responses and the government's 'minded to positions' on hydrogen transport and storage business model designs, ...

### North Macedonia adopts National Energy and Climate

The meetings focused on the state of energy sector reforms in North Macedonia and advancing the decarbonisation agenda in the face of the current situation on the energy markets. Director Lorkowski invited all stakeholders to actively engage in an inclusive process of setting 2030 targets for energy efficiency, renewables and greenhouse gas

## IMF Country Report No. 24/27 REPUBLIC OF NORTH ...

REPUBLIC OF NORTH MACEDONIA SELECTED ISSUES This paper on the Republic of North Macedonia was prepared by a staff team of the International Monetary Fund as background documentation for the periodic consultation with the member country. It is based on the information available at the time it was completed on January 4, 2024.

### North Macedonia drafts two laws introducing energy ...

The draft Law on Energy, the first new version after five years, stipulates that the status of a strategic project, eligible for state aid, can be declared for high-voltage power lines, energy storage, key equipment and ...

### North Macedonia

and the Storage Regulations. Improving the environment 50% North Macedonia achieved limited progress in the area of environment. The long-standing non-compliance with the Na - exchange of balancing energy. In 2022, North Macedonia adopted amendments to the Energy Law, partially transposing the TEN-E Regulation (EU) 347/2013.

### A shared energy storage business model for data center clusters

The large energy consumption of DCs is an ongoing trend [21, 22]. There have been many studies focusing on the cost of green power usage [23, 24], and the improvement of

renewable energy accommodation level of data centers has been a hot spot in recent years [25, 26]. Recent works find out that DCs' power consumption from the traditional power grid can be ...

## North Macedonia drafts two laws introducing energy ...

According to the draft Law on Energy, operators of battery energy storage systems will enter the electricity market. North Macedonia published it in a package with the new Law on Renewable Energy Sources, ...

## BMZ starts construction of new production facility in Macedonia

Ms. Jelica Ivanovska, Managing Director of BMZ North Macedonia, added: "With this new facility, we are laying the foundation for BMZ's future expansion while ensuring that we remain competitive in the global marketplace. We are looking forward to becoming a part of North Macedonia's economic growth and to a successful future."

## Social aspects of the energy transition in North Macedonia

Increasing the clean energy storage capacity for creating jobs and balancing the country's energy system. Increasing renewables penetration rates and the role of energy prosumers and

communities in the energy system of North Macedonia. Addressing mines' reclamation and repurposing. Supporting people and communities affected by coal phaseout
