ECONNECT Energy wins grant award for ammonia project

ECONNECT Energy's Azane Fuel Solutions' first project "Ammonia Fuel Bunkering Network", which will build a green ammonia bunkering terminal, has been awarded NOK 89 million (EUR 8,600,000) through the Norwegian Green Platform Initiative, as announced by Minister of Climate and Environment in Norway, Mr. Sveinung Rotevatn.

Jettyless Transfer

A jettyless transfer system is floating technology that enables safe and efficient transfer of fluids such as LNG, ammonia, bio fuels and CO2 (for carbon capture and storage) between a carrier and an offshore or onshore terminal without a ...

The company holds a leading position within

Discussing the energy solutions of the future

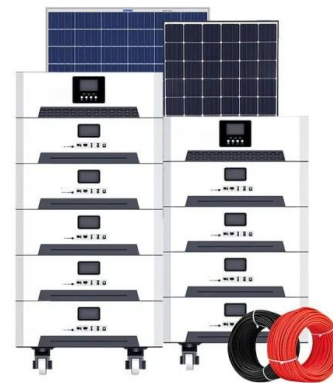

It involves transitioning from a fossil-based energy system to a global one based on renewable energy and low-carbon solutions. This includes much more efficient use of energy, technologies to prevent CO₂ from being released into the atmosphere (such as carbon capture and

storage) and a sharp increase in electrification.

Business Norway

EConnect Energy conducted the world's first commercial LNG transfer without a jetty at the Herøya Industrial Park in October 2017. Since then there has been tremendous international interest from markets as diverse as China, Finland and South Korea, and the company is in dialogue with various European ports where LNG is imported or bunkered.
