

## European Solar Energy Storage

# Nova new energy Switzerland

## Overview

---

What is Nova Swiss?

The goal of its six-year journey is to provide new information on renewable energy sources and also to demonstrate the potential of sustainable technology. Nova Swiss develops and manufactures across four product lines/production areas: High-Pressure Technology, Engine Components and Surface Technology.

What is Nova Swiss surface technology?

The high-pressure technology developed by Nova Swiss is every bit as effective as these natural tools. With their multi-layered structure, diatoms are the true godfathers of Nova Swiss Surface Technology. They consist largely of silicon, an important material in future technologies and a key component of technical ceramics.

How much does Nova Energy NZ cost?

Nova Energy NZ costs \$89 per month when bundled with internet, electricity, and a 43-inch LG Smart TV (43UP7750PVB). To upgrade to a 50-inch TV (50UP7750PVB), there is a one-time payment of \$299. Nova Energy NZ offers both low and standard user plans, but the same broadband contract applies to your power contract.

Why should you choose Nova Swiss engine components?

Nature is able to create highly complex tube systems. Coral reefs are home to an endless variety of shapes. Inspired by this natural role model, Nova Swiss Engine Components also produce complex-shaped components for marine diesel oil and gas engines in unsurpassed, long-lasting quality. High pressure is also present in nature.

Who is Nova Energy?

Nova Energy is among one of the most trusted utility companies that offer

broadband, phone, gas, and electricity in New Zealand. Throughout the years, they've gained thousands of customers and remain to be the preferred provider for most homes and businesses nationwide.

When did Nova Werke AG move to Effretikon?

In March 1970, NOVA WERKE AG relocated to Effretikon in the canton of Zurich. Around the same time, the company diversified into new fields that focused on high technology. With a primary specialism in the "high-pressure technology" segment, it produced components, systems and plants for high-pressure applications up to 10,000 bar.
