Oman Iges 16h prime

Overview

What is Iges Prime Plus?

LGES's Prime Plus isn't a new Prime battery. Rather, it's a new system configuration that offers more capacity flexibility and increases your battery's power output beyond the base level of an individual 10H or 16H Prime battery. A Prime Plus configuration connects two 10H or 16H Prime batteries together for a storage capacity of 19.2 or 32kWh.

What is LG resu16h Prime?

Part of the latest generation 3 series in the LG RESU line-up. The RESU16H Prime is the largest lithium-ion residential battery storage in the world, supplying a total energy capacity of 16 kWh. The latest RESU16H Prime provides an all-new continuous power rating of 7 kW and a peak rating of 11 kW.

How much does a Iges Prime battery cost?

In comparison to other similar batteries, LGES Prime batteries are much cheaper and are among the more affordable battery options we've come across. The 10H Prime typically costs somewhere between \$5,700 and \$8,500 before installation and the 16H Prime is about \$7,000 to \$11,000 before installation.

How many 10h & 16h Prime batteries can I install?

What you see is what you get. One 10H Prime battery has 9.6kWh, with one 16H Prime battery offering a bit more capacity at 16kWh. You can install one additional 10H or 16H Prime for an additional 9.6kWh to 16kWh. Keep in mind that you can't mix and match sizes. You can either install two 10H Primes or two 16H Primes.

Does Iges Prime Plus have an inverter?

Prime Plus is the first residential energy storage system released by LGES in

the US that includes an inverter. Both of LGES's other batteries, the 10H and 16H Prime, don't include inverters. This means you'll have to buy a separate compatible inverter. The new Prime Plus system is also designed for faster installation.

What is the depth of discharge rating on the 10h & 16h Prime?

What stands out is the depth of discharge rating on the 10H and 16H Prime. A depth of discharge rating is a limit set by the manufacturer on how much energy you can safely discharge (drain) from your battery all at once without compromising its lifespan. Both batteries have a depth of discharge rating of 100%.

Oman Iges 16h prime

16H Prime

16H Prime REV 3.8. RESU16H Prime Product Specification (1/2) ?Test Conditions - Temperature 77°F (25°C), at the beginning of life ?Usable Energy is measured under specific condition from LGC(0.3CCCV/0.3CC) ?Product specification may change without notice 1) DOD 100%. Erfahrungsaustausch LG RESU 10H und 16H PRIME im Realbetrieb

Ich weiß, es gibt schon den großen LG 10H Thread aber der ist nicht explizit für die Prime

Version die sich ja doch etwas anders verhält und auch technische Unterschiede aufweist. Bisher bin ich sehr zufrieden, die 10H Prime lädt ja mit max 4,5 kW an meinem WT, und entlädt auch mit 4,5kW. Ist aber eher eine Limitierung des Wechselrichters.
