Is this the Pace BMS in all the server rack batteries?

For PACE BMS to work with Victron, it requires release candidate firmware 3.0.0~15 or newer. Otherwise charging stops at 52.4v. I requested Victron modify the firmware and submitted the code to them that fixes this, it was implemented to the candidate release stream first thing this year I'm not sure if this is what Andy was having trouble

100A or 200A BMS?

It has been suggested here on the forum that some of the cheap Chinese BMS should be derated by 50%. So a 100 amp BMS is really only good for 50 amps. Some BMS will allow a surge over the amp rating, but only for very short periods of time. The 120 amp JBD BMS (aka Overkill Solar) has been proven to run continuously at 120 amps.
