[2018 Papua New Guinea earthquake](#)

The Papua New Guinea earthquake was a magnitude 7.5 earthquake that occurred in the Hela Province of Papua New Guinea on 26 February 2018 (25 February UTC), at 3:44 a.m. local time (25 February, 17:44 UTC). The earthquake's epicenter was 10 kilometres (6.2 mi) west of the town of Komo. The maximum felt intensity was IX (Violent) on the Mercalli intensity scale. [2]

Biodiversity of Papua New Guinea (PNG): Attempting a More

Papua New Guinea (PNG) is one of the few megadiversity nations in the world. It's essentially an ancient species engine and hosts world-relevant populations of wildlife and plants, with a co-evolved human society for over 47,000 years. Many of the species

Modeling of potential renewable energy in Papua New Guinea

Papua New Guinea is a unique country with diverse resources and renewable energy resources are no exception. Solar and biomass resources have been presented in this article because of their huge availability in Papua New Guinea. With the engagement of remote sensing and geographic information system technology, potentially suitable areas were ...

Detailed Satellite Map of Papua New Guinea

Maphill presents the map of Papua New Guinea in a wide variety of map types and styles. Vector quality. We build each detailed map individually with regard to the characteristics of the map area and the chosen graphic style. Maps are assembled and kept in a high resolution vector format throughout the entire process of their creation.

Evidence for rhenium enrichment in the mantle wedge from ...

The low Re abundance in arc-type volcanic rocks characterized by high $^{187}\text{Os}/^{188}\text{Os}$ ratios is an unsolved puzzle of the ^{187}Re - ^{187}Os isotope system, leaving a significant gap in our understanding of the evolution of the upper mantle-continental crust system. Here we report new observations of high Re concentrations in fresh, submarine-erupted-i.e., relatively undegassed ...

Hugh Davies

7 Earth Tok is an introduction to the earth sciences. It was born in 1990 as a hastily written text book for the First Year geology course at University of Papua New Guinea.

Tectonic setting of the Papua New Guinea region. Topography ...

New Guinea (PNG) is one of the most tectonically complex regions in the world, involving microblocks rotating rapidly about nearby poles. The general tectonic framework of this region (Fig. 1

5 Fantastic Updates

In Papua New Guinea, the sun sets by 7pm leaving rural communities who don't have electricity access in total darkness. This makes it hard for those living in the community to cook, work and socialise after sunset. To address this, we helped introduce solar lighting for 129 people in the community.

(PDF) Swarm-TEC Satellite Measurements as a Potential

...

On May 14, 2019, a strong $M_w=7.6$ shallow earthquake occurred in Papua New Guinea. This paper explores for the first time the analysis of Total Electron Content (TEC) products measured for six

Mana and Papua New Guinea's defense minister, Billy Joseph, flew on Sunday in an Australian military helicopter from the capital of Port Moresby to Yambali, 600 kilometers (370 miles) to the

Tectonic and climatic controls on the Plio-Pleistocene evolution of

Papua New Guinea (PNG) has the potential to provide such key lines of evidences, as it is a major island in the WEP and locates at a pivotal position in the climatic and oceanographic systems of the tropical Indo-Pacific (Fig. 1 a) the vicinity of PNG, air-flows converge to form the ascending convection center for zonal Walker and meridional Hadley ...

Diapiric exhumation of Earth's youngest (UHP) eclogites in the ...

The Woodlark Rift in Papua New Guinea hosts the world's youngest (2-8 Ma) eclogite-facies rocks and extensional deformation has played a key role in exhuming these (U)HP rocks at rates of > 20 mm/yr.

[CNEOS 2014-01-08](#)

The Galileo Project intends to recover fragments of CNEOS 2014-01-08 from the seafloor off the coast of Papua New Guinea [29] Amir Siraj, one of the authors who reported the finding of the

purported interstellar meteorite, noted,

Biodiversity and Climate Geoportal

Papua New Guinea, home to 5% of the world's biodiversity in just 1% of its land mass, guards a breathtaking trove of natural resources including virgin rainforests, coral reefs, flora and fauna. ...

The Papuan gardeners using their onions

But in Papua New Guinea they are natural bedfellows. Vanilla plants grow like vines and are best when they're supported by "host" trees. These trees serve a double purpose as their branches and leaves provide dappled shade from the harsh tropical sun, making perfect growing conditions for other crops, like onions.

Papua New Guinea: Pristine Seas Explores one of the ...

Papua New Guinea is spectacular, and we have observed everything from rare deep water sharks to amazing fish diversity on the nearshore reefs. And still, by far, the thing that I will take away from the first leg of our expedition is the ...

Descriptive Model of the July 17, 1998 Papua New Guinea Tsunami

The tsunami that struck New Guinea on July 17, 1998 was the most devastating tsunami since the 1976 Moro Gulf, Philippines, tsunami and may surpass that event (Lockridge and Smith, 1984; Satake and Imamura, 1995). The high reported runups and the tremendous loss of life

are of great concern to all, including the international scientific community.
