Solar PV potential in Paraguay by location

Explore the solar photovoltaic (PV) potential across 2 locations in Paraguay, from Asunción to Fernando de la Mora. We have utilized empirical solar and meteorological data obtained from NASA's POWER API to determine solar PV potential and identify the optimal panel tilt angles for these locations.

Solar Energy Paraguay

Paraguay holds the rare title of the world's largest exporter of electrical energy, but many argue that it is an inefficient exporter because the compensation it obtains is much lower than the market price of energy; at the same time as an inefficient consumer because it uses a very low amount of its installed hydroelectric capacity.

Electricity sector in Paraguay

Paraguay is one of the few countries in Latin America that has maintained an integrated electrical system. [1]Because of the dominance of hydroelectricity, tariffs (mostly residential) are remarkably below the averages for the region. However, despite the abundance of resources, the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and ...
