# Pitcairn Islands roof solar panel cost

## Overview

---

We aim to provide a payoff period of 7.5 YEARS OR LESS, or at most, less than half the life of a general 25 year warranted solar system, meaning if a system saves you \$1200 per year (7 kW system), then it should cost you absolutely no more than \$15000. As utility rates tend to increase, we take this as a factor in our calculations at an .

We aim to provide a payoff period of 7.5 YEARS OR LESS, or at most, less than half the life of a general 25 year warranted solar system, meaning if a system saves you \$1200 per year (7 kW system), then it should cost you absolutely no more than \$15000. As utility rates tend to increase, we take this as a factor in our calculations at an .

Following an EU commissioned study in 2017, the EU agreed to fund a Renewable Energy project for Pitcairn to replace fossil fuel with Solar Power under the EDF 11 Regional Envelope and we have been working with our partners in New Caledonia who manage the project on behalf of the four Pacific EU Overseas Territories.

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy .

The Solar Hybrid Systems project in Adamstown, PITCAIRN ISLANDS, is working to supply and install a solar PV hybrid energy system for the benefit of Adamstown community and the government of Pitcairn to achieve their renewable energy objective. The system will enable the community to access a reliable, affordable and clean supply of energy and .

Precisely estimating a universal cost to remove solar panels to replace a roof is challenging, as it largely depends on individual circumstances.
