

European Solar Energy Storage

Plf energy Ghana

Overview

What role does the private sector play in Ghana's energy transition?

The role of the private sector is key in the implementation of Ghana's energy transition agenda. The private sector must be engaged in the implementation of the plan to guide their investments in the energy transition. Government shall provide the enabling environment and encourage investment in the clean energy sector.

What is the National Energy Transition framework of Ghana?

This Policy extensively incorporates the implementation of the National Energy Transition Framework of Ghana which guarantees the best fuel supply security through the provision of a cost-efficient diversified energy mix to accelerate socio-economic development and to achieve universal access to electricity by 2024.

Does Ghana still use liquid fuels for power generation?

The use of liquid fuels for power generation in Ghana has diminished significantly following the discovery and use of natural gas for power generation. AKSA is the only thermal power plant that continues to run on HFO for power generation.

Can a solar power plant be profitable in Ghana?

Other sites with much bigger potential can be profitable if only they are developed as hybrid schemes or for multi-purpose (water supply, irrigation, transportation) use. Ghana is well endowed with solar energy resources, which could be exploited for electricity generation and thermal applications such as water heating and crop drying.

What is the national energy policy of Ghana?

XVII Art. Cabinet at its forty-seventh meeting on 25th March, 2023 approved the reviewed National Energy Policy of Ghana which is intended to guide the

development and management of Ghana's energy sector, especially during this era of the global call to transition to clean energy use.

How can Ghana meet future gas demands?

Meeting future gas demands will require that gas production from Ghana's fields is increased and additional sources exploited. The establishment of LNG terminals will also contribute to meeting gas demands in the future. There are over twenty-five (25) discoveries across Ghana's sedimentary basins, of which four are being considered for appraisal.

Plant Load Factor and its Calculation

But it is usually not the practice to operate a Generator beyond its rating. Thus, normally PLF is less than 1. PLF can also be defined in terms of energy supplied by the plant for a given period of time. Let us suppose that we are only interested in calculating PLF for a period of T. Then plant load factor PLF from (1), $PLF = (P_{avg} \times T) / (P_{max} \times T)$
