What type of power plugs are used in Latvia?

In Latvia, power plugs and sockets (outlets) of type F are used. The standard voltage is 230 V at a frequency of 50 Hz. For more information, select the country you live in at the top of this page. We don't sell power plug adapters. We refer you to Amazon, where you will find a great selection of travel adapters.

Are there different types of plug outlets in Latvia?

Different countries have different plug outlets, and there are a surprising number of variations out there. So to make sure you pack the right adaptor, read on for a handy guide to plug outlets in Latvia. What plug types are used in Latvia?

Latvia has 2 associated plug types: type C and type F. Type C has two round parallel pins.

What voltage is used in Latvia?

Voltage used in Latvia is 220V and the electrical frequency is 50Hz. (more details after you choose where are you plugs from.) Select your departure country for a detailed report of adapters, plugs and handling advise for electronics abroad. Are your plugs from United States of America?

.

Is it dangerous to use a voltage converter in Latvia?

It can be extremely dangerous to use an electrical appliance that is rated at a voltage different from the supply. As voltage can differ from country to country, you may need to use a voltage converter or transformer whilst in Latvia. If the frequency is different, the normal operation of an electrical appliance may also be affected.
