

## European Solar Energy Storage

**Portable energy storage power supply shipped nationwide**

## Overview

---

What can a portable power station charge?

A portable power station can charge and power a variety of devices, from small electronics like smartphones, tablets, laptops, and cameras to larger appliances such as mini-fridges, TVs, and even power tools.

Can a portable power station run a refrigerator?

Anker SOLIX portable power station supports 4 types of charging: Solar Input, Gas Generator, AC Outlet and Home Power Panel. Can a power station run a refrigerator?

Yes, a portable power station can run a refrigerator, but exactly how long depends on the output capacity of the power station and the power of the refrigerator.

How to choose a portable power station?

When selecting a portable power station, consider your needs. For small devices like headphones and smartphones, a compact portable power station of around 100Wh is sufficient, similar to a big power bank. However, for larger devices such as refrigerators or TVs, opt for a more heavy-duty option with 500Wh or more.

How much power does an Anker portable power station have?

For example, A typical Anker portable power station can come with an impressive 2048Wh, far exceeding the capacity of any power bank. What's more, power stations offer diverse recharging options, including portable power stations with solar panels, while power banks mainly rely on wall chargers.
