Cathodic Protection System (CPS) - Emira Energi

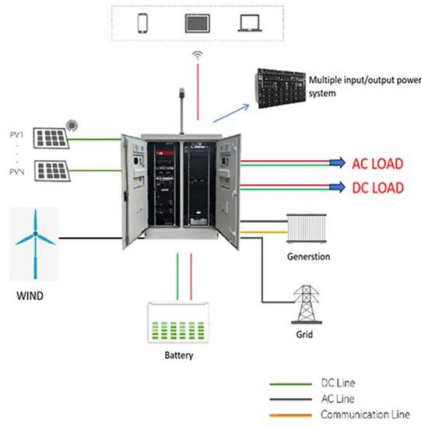

Cathodic Protection is the most widely applied electrochemical corrosion control technique. This is accomplished by applying a direct current to the structure such as pipelines, storage tanks, pressure vessels and others which causes the structure potential to change from the natural corrosion potential to a protective potential in the immunity region.

Hardness Testing

Hardness is the measure of how resistant solid matter is to various kinds of permanent shape change when a force is applied. Macroscopic hardness is generally characterized by strong intermolecular bonds, but the behavior of solid materials under force is complex; therefore there are different measurements of hardness: scratch hardness, indentation hardness, and ...
