Refu drive Sudan

Overview

Who is refu drive?

REFU Drive GmbH | 1,914 followers on LinkedIn. Powerful drive solutions for e-mobility | We develop solutions for efficient, economically and ecologically conscious work. Wherever electrification of mobile machinery and commercial vehicles is in demand.

Where can refudrive be used?

Wherever electrification of mobile machinery and commercial vehicles is in demand. Whether in automated vehicles for container transport, in machinery for agriculture or construction applications or for modern municipal vehicles and e-busses - the system solutions from REFUdrive can be used flexibly, efficiently and sustainably.

What can refudrive do for You?

May hope, peace, joy, and love fill your homes and your hearts. E-mobility made easy - with REFUdrive! We at REFUdrive make it easy for you to electrify mobile applications! From the idea to series production, we support you throughout the entire product realisation process - flexibly, efficiently and with the highest precision.

Does refudrive support gozero?

In this way, we not only live up to our own claim, but also effectively support the "GoZero" initiative of the PRETTL Group, the parent company of REFUdrive.

How can refudrive help you e-mobility?

E-mobility made easy - with REFUdrive! We at REFUdrive make it easy for you to electrify mobile applications! From the idea to series production, we support you throughout the entire product realisation process - flexibly, efficiently and with the highest precision. München, Messe München, Hall B4,

Stand 100/8 Cologne, Kölnmesse, Stand: 6020.

Why should you choose REFUdrive components?

REFUdrive components are compact, robust and durable, highly efficient and easy to integrate into a wide range of environments. With the most comprehensive product portfolio on the market, we are able to cover a wide range of applications.

customization for the particular drive task at hand. All requirements, from a simple VFC (voltage frequency control) drive to a highly dynamic FVC (flux vector control) drive can be covered with 2 different control components. Indramat Refu has developed its own patented flux vector current regulator for this. The system offers drive converters in

The ambient temperature can range from -25 °C to +85 °C, which allows for amazing performance. It also meets protection class IP67, which can optionally be upgraded to IP6K9K. Thus, the inverter is not only powerful, but also extremely reliable and robust. With these features, it is perfect for all applications where drive inverters are needed.

Unsere Komponenten für Ihr Mehr an Flexibilität

Gestalten Sie Ihre Antriebslösung, Ihren eigenen drive. UNSERE KOMPONENTEN FÜR IHR MEHR AN FLEXIBILITÄT. Damit in der Entscheidung zwischen elektrischem Antrieb und partieller Elektrifizierung zur Erhöhung des Wirkungsgrads nicht nur die richtige Wahl getroffen, sondern auch die passenden Komponenten gewählt werden, bietet REFUdrive Ihnen
