Rmt energy Brunei

Overview

The Department of Energy (: Jabatan Tenaga), previously known as the Ministry of Energy and Ministry of Energy, Manpower and Industry, is a in the which oversees the country's . The department is led by the incumbent Deputy Minister of Energy, Mohammad Azmi bin Mohd Hanifah. The ministry is headquartered in the capi.

Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-of potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

What is the energy supply of Brunei Darussalam?

In 2015, the total primary energy supply (TPES) of the country for both energy sources was 3.26 million tons of oil equivalent (Mtoe) in total, with 3.07 Mtoe or 94.3% from natural gas (Table 3.1). Brunei Darussalam has 922 MW of installed capacity in power generation of public utilities, including a solar photovoltaic (PV) at 1.2 MW.

How much energy does Brunei need?

In 2005, Brunei's total energy needs was 2,435 KTOE. As of 2022, approximately 127,000 barrels of oil and 243,000 barrels of natural gas equivalent are produced daily by Brunei's oil and gas fields. An refinery used for the oil field in Seria. In 2005, oil supplied 24.4% of Brunei's total energy needs.

Who organised the Brunei oil & gas conference?

The event was co-organised by the Department of Civil Service and Brunei Research Department and in collaboration with Radio Televisyen Brunei. The Department of Energy's provides range of information related to the oil and gas industry through a number of publication as well as statistics.

Does Brunei Darussalam have oil & gas reserves?

Supply Brunei Darussalam continues to strengthen upstream oil and gas activities to ensure long-term energy security and sustainability of oil and gas reserves. It is developing unexplored areas, such as deepwater fields.

Is Brunei a natural gas or oil based country?

Brunei's total primary energy supply (TPES) and total final energy consumption (TFEC)'s historical oil and gas trend, particularly, 80% and 20% of TPES are made up of oil and natural gas, respectively. Oil saw annual increase of 0.7% from 2010 to 2017, however natural gas saw annual growth of -0.9% because of a decline in natural gas output.
