Metal Clamp , Standing Seam Metal Roof Clamps , S-5!

We Only Use Chemically and Mechanically Certified Raw Material. Certified quality begins with certified raw material, followed by certified manufacturing and certified testing for holding strength and other product characteristics.. Our roof clamps use non-corrosive materials and are metallurgically compatible with all common roof materials including titanium-zinc, stainless ...

S-5-SolarFoot

The SolarFoot provides an ideal mounting platform to attach the L-Foot* of a rail-mounted PV system to the roof. This solution is The Right Way to secure rail-mounted solar systems to exposed fastener metal such as AG-Panel or R-Panel. *L-Foot and fasteners not included. SolarFoot includes pre-attached 8mm stud and one 8mm hex nut. SolarFoot

S-5! SolarFoot(TM)

The key to frequency and spacing of attachment points for PV is to distribute loads to the metal standing seam panels in a manner that is consistent with the intended distribution of loads from the roof panels into the building structure. ?NOTE: The following suggestions assume that determination has been made that the roof to which the S-5! clamps will be attached is ...

SolarFoot(TM)

The SolarFoot provides an ideal mounting platform to attach the L-Foot of a rail-mounted PV system to the roof. This solution is The Right Way to secure rail-mounted solar systems to exposed fastener metal such as AG-Panel or R-Panel.

S-5! Clamps - BuyS-5

S-5!® clamps attach to the metal roof panel seam by the tightening of two "bullet-nosed" stainless steel setscrews against the seam material. (This is usually done with an industrial grade screwgun.) The setscrews compress the seam material against the opposite wall of the clamp. They will "dimple" the seam material, b

S-5! Metal Roof Brackets & Clamps , Standing Seam Roof Clamps

Disruptive Innovation In 1991, we created a whole new product category that changed the way people thought about metal roofs - making it simple and easy to mount things to metal roofs in prudent, engineered ways that cause no harm to the roof. The real game-changer was that these innovative standing seam roof clamp technologies actually cost less "the right way" than all the ...
