Safaricom has increased its solar power base stations to

Safaricom has increased its solar power base

stations to 1,432, with 23% using sunlight to generate electricity. The move is part of the company's plan

Energy solution makes a greener Safaricom

With average altitudes ranging from 1500m to 1700m, Kenya is rich in solar energy resources. As a result, Safaricom decided to utilize these sustainable natural resources to construct a green communications network. To help Safaricom utilize the alternative energy, Huawei proposed a site energy solution that combines solar and diesel.

Safaricom and M-Kopa KES 40 a Day Solar Unit, All You Need to ...

To buy the solar unit you will need to make an initial deposit of KES 2,500 to get a d.light solar home system then pay daily installments of KES 40, via M-Pesa, for one year. The solar unit has an embedded Safaricom enabled sim card through which your solar system will be switched off if you fail to pay the installments.

Our ESG Targets

Purchase or generate 50% of energy needs from renewable sources by installing solar PV and battery storage for 5 000 sites; Grow 5M trees as part of our carbon offset programme;
