### Who is Saft battery?

For more than 100 years, Saft has been specializing in advanced-technology battery solutions for industry, in space, at sea, in the air and on land in remote and harsh environments from the Arctic Circle to the Sahara Desert. Today, Saft is a wholly-owned subsidiary of TotalEnergies.

### Why is Saft the best marine battery supplier?

Tighter emissions regulations, lower margins and more complex applications mean today's marine battery industry has three basic requirements: to be environmentally friendly, cost-efficient, and safe. Saft batteries meet all these and more, making Saft the go-to marine battery supplier for the likes of Rolls-Royce and Benetti.

### Which marine propulsion batteries do Saft offer?

Saft offers the following selection of lithium-ion marine propulsion batteries: With a legacy of more than 100 years in nickel battery technology, Saft's nickel marine battery systems are regularly installed on ships and boats for critical engine starting and backup power duty.

### Are SAFT Batteries safe?

For over 100 years, Saft's longer-lasting batteries and systems have provided critical safety applications, back-up power and propulsion for our customers. As a leading battery company, Saft's innovative, safe, and reliable technology delivers high performance on land, at sea, in the air, and in space.

### What are SAFT Batteries used for?

Whether it be for aerospace or transportation, telecom & networks or oil & gas, health or energy utilities, Saft batteries are used for numerous applications and on all continents. From the Arctic Circle to the Sahara Desert, or within NASA and European Space Agency vessels, we provide state-of-the-

art batteries and battery systems.

Does Saft supply lithium-ion batteries?

In July 2013, Saft was awarded a \$6.5 million contract to supply high power lithium-ion batteries for the Lockheed Martin F-35 Lightning II. Saft also supplies the battery for the Exagon Furtive-eGT, a four-seat electric sports car produced by Exagon Motors.

### **VL51ES battery , Soft , Batteries to energize the world**

Soft solution for high power space applications based on Soft VL51ES Li-ion cell. Specifically designed for GEO and MEO applications. Battery specific energy superior to 130Wh/kg. Adaptable configuration from 2p to 12p and from 6s to 36s. Reliability and safety. PR architecture, up to 100V bus; Technical Specifications. Optional bypass

### **Field chargers , Soft , Batteries to energize the world**

Field chargers. Soft's EcMC<sup>2</sup> state-of-the-art chargers are rugged, multi-channel, multi-position and multi-chemistry. They are designed for easy transport and operation, can automatically recognize the type of military battery they are charging, and can simultaneously recharge a number of different batteries regardless of their state of charge or chemistry.

## Block nickel batteries: SBLE, SBM, SBH

Features & Benefits. Constructed in robust and reliable Saft Nife® pocket plate, our block nickel batteries function in a wide range of temperatures, resist electrical abuse, shock and vibrations and need only basic maintenance. This

ensures a low total cost of ownership (TCO) over a life cycle that can last 20 years or more.
