The MICROLYTE MP Series of AGM batteries

The SEC Microlyte MP series of VRLA monoblocs are a classic top terminal range of AGM batteries. They were designed as a cost effective but reliable solution for many uses, engineered with lead calcium plates to give them a triple benefit.

SEC Leads The Battery Industry Charge

World Class Quality You Can Trust. Every battery and highly developed industry component we stock has close to 40 years of research, engineering and design behind it.

Products

The Microlyte MRT AGM battery is a premium product in the mainstream VRLA monobloc market. High tin plates mean a long float life product with a renowned cycling ability. Add in great high rate performance and you have a product that consistently outperforms all the competition.

Battery , B& R Industrial Automation

Battery packs and battery cases must be strong and lightweight. The combination of different materials is a challenge for joining technology. With its technology, Ejot offers the possibility of creating mixed joints, especially lightweight materials such as aluminum and high-strength

steels, with a robot-friendly friction element joining tool.

SEC Industrial Battery was the first to use a patented technology to extend the design life and improve the performance of VRLA batteries. We called it the SEC CatVent and its been supercharging our batteries ever since. When inserted into the headspace of a cell, the CatVent helps to balance the electrochemical activity.
