

European Solar Energy Storage

Samsung bess Thailand

Overview

What is Sungrow Bess?

Sungrow BESS supplied to a recently-completed renewable energy project in Japan. Image: Sungrow. What is thought to be Southeast Asia's single largest battery energy storage system (BESS) to date will be supplied to a solar PV-plus-storage project in Thailand by Sungrow.

How many Bess projects were approved in Thailand in 2022?

In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW. Interestingly, this allowed generators to sign semi-firm power purchase agreements (PPAs) with the Electricity Generating Authority of Thailand (EGAT) with minimum availability guarantees.

What is Bess project?

The cumulative cooperation has achieved the GW scale. Among all the previous ones, this BESS project is a milestone, which can help improve the Thai power structure, quicken the establishment of an intelligent power grid and possibly guide the future power generation and storage of new energy in the whole Southeast region.
