Solar Panels in San Marino, CA: #1 Solar Energy System

When your San Marino solar panel produces excess energy, it is sent back to the grid. You can use this energy at night or on cloudy days, when your solar system may be generating less power. This allows you to keep your home or business running the entire year on solar power. Thanks to net metering, none of the electric produced by your system

Who We Are

Indigo Energy started when Allen Himes came to Myanmar in 2012 to explore the possibility of developing renewable energy projects. While he looked through a number of potential opportunities including large-scale wind farm development and biomass gasification, Indigo Energy invested early in the Myanmar electricity sector by developing, designing, building, and ...

Indigo Solar

Indigo Solar is a joint Venture between two energy companies - Indigo Energy and Velo Solar. The two companies bring their expertise in their respective energy fields to provide renewable energy to clients which reduces their carbon footprint while improving their bottom line.

Frequently Asked Questions

Please click on the question to expose the answer. How does solar power work? Solar panels convert sunlight into direct current (DC) electricity. An inverter then converts the DC electricity into alternating current (AC) electricity, which is used to power your home or business. Any excess electricity is sent back to the grid for others - Indigo Solar Energy
