Our History , Energy Storage Group at UC San Diego

Explore the history of UC San Diego's Energy Storage Group--from early EV battery research to leading carbon capture and microgrid integration projects.

Renewable Energy and Storage

We measure renewable energy by tracking the number and capacity of new solar installations and the increase in incentivized energy storage projects in the SDG& E service territory.

THE ENERGY STORAGE GROUP

Advancing energy storage technologies to unlock the full power of solar, wind, and other renewable energy sources. Founded in 2012, our mission is to develop and test storage solutions that accelerate the transition to a clean energy future.

The Center For Energy Research

Together they perform basic and applied research in fusion, solar energy, fuel cells, energy storage, and related disciplines. CER also

sponsors energy-related lectures, symposiums, and academic conferences.

UC San Diego Energy Storage Group , Advancing Energy Storage ...

Discover how UC San Diego's Energy Storage Group is driving the future of renewable energy with cutting-edge research in battery storage, microgrids, and carbon removal.

Energy Storage

As San Diego and the world continue to invent new ways to maximize energy output from clean resources, a new challenge arises of how and where to store that clean energy.

Clean Energy

In addition to electricity, a 300-ton absorption chiller captures waste heat from the fuel cell to produce chilled water that is stored in the nearby Thermal Energy Storage system. Energy Storage UC San Diego is a global leader in advanced ...

UC San Diego Microgrid , Real-World Testing for Energy Storage ...

It enables researchers, utilities, and industry partners to test, validate, and refine emerging energy technologies in a real-world, grid-connected environment.

Energy Storage Projects , UC San Diego Center for Energy Research

Browse past, present, and future energy storage projects from UC San Diego's Energy Storage Group. Filter by research area and see real-world impact in action.

[Center for Energy Research \(CER\)](#)

Our work spans from fundamental physics and chemistry of nuclear fusion, lasers, and advanced materials to renewables grid integration research on battery energy storage, solar inverters, and solar forecasting.
