Save Energy Systems

There are a number of companies with platforms that manage demand, but these only shift energy loads based on set schedules and not conditions. The DLC dynamically manages energy use and demand, taking into account the temperature and learned behavior of each zone, the current outside temperature and forecast to adjust use based on changing

Asset Management

The Save Energy Systems solution suite offers Asset Management to help maximize the efficiency and longevity of your Facility's assets. Digitally take care of optimizing and controlling energy distribution and automation systems across different voltage levels.

Energy Save

At Energy Save we are specialists on developing heat pump based systems and concepts. We offer the market cost efficient and high quality energy products with less environmental impact. Our product range stretches from 6 kW domestic heat pumps up to 1,4 MW systems for commercial buildings.

About Us

Energy Save is an innovative Swedish energy technology company that contributes to the sustainable energy transition in Europe through cost-effective and smart air-to-water heat pump systems. We have been delivering heat pumps to the European market since 2009 and are listed on the Nasdaq First North Growth Market.
