### 18650 best soldering technique? , Second Life Storage & Solar

Soldering iron: 70W Taiyo ElectricPX-401, set to ~390C, with 5mm diameter "large tip for high thermal-storage", but cut at an angle to allow pointed contact. Solder: Standard 60/40 rosin core, 1mm diameter I think this technique works well, because: 1) The rosin has no time to boil away and gets to work immediately, maximizing its effectiveness

### 18650 DIY powerwall 48v , Page 3 , Second Life Storage & Solar

Slight clarification. The OP asked about a panel config rated for 21.7a - e.g. 2p. But the charge controller unit has a 18a max input. I'm not saying the panels would produce more than 21.7a but that they could produce up to 21.7a if ...

## Mixing 18650 capacities

So I have over 2000 used 18650 cells. I have capacity tested them all and now have a range of between 1200-2000mAh. The thing you need to take into consideration is what was the cells capacity at the start of its life, and what is it now. If it's more than about 25% drop, then you probably don't want to use it. Original 3000mAh Now 1700mAh

## **How to Properly Use 18650 Battery Pack Builder?**

I have a few hundred Headway LFP cells that I tested for capacity and IR. I want to make some 4S battery banks for car audio. I would like to make some different ah configurations probably from 16ah (2P) all the way up to 96ah (12P), but for now let's assume I'd like to just make some 48ah

## **Panasonic CGR18650E Cell Specifications**

Warning: The information in this thread was obtained from various sources on the Internet, including any datasheets linked below, and is provided for reference only is not guaranteed to be accurate. To prevent fire or personal injury, never charge or discharge a cell before verifying

the information yourself using the original specifications sheet provided by the ...

## 18650 advice for beginner , Second Life Storage & Solar

And since you are new here, it may be tempting to buy some high capacity 18650's online for real cheap. Be aware, there are absolutely zero 18650, 25650, or similarly sized cells that are higher capacity than 3500-4000mAh. They are scams. And anything that has the word "Fire" in the name, take that as a warning not a name.

## [Average Salvage Success Rate 18650](#)

Samsung ICR 18650 26D Panasonic CGR18650E  
 The Samsung cells I have had very good success rate, most are testing to be over 2500mah, so practically new. The panasonic cells come in second. Their cells have tested every single time to be above 2000mah per cell, with none going

below that. The sanyo cells come in third.

## 18650 Garden-Powerwall with 50KWh in Germany , Second Life Storage ...

Hello, my name is Stefan ( 37, from Germany) and after reading a lot at this wonderful board and watching tons of vids from HB and others at YT since the last few month I'd like to share my building progress with you folks, show my successes and my mistakes too. The beginning: in march this year finished my first installation of a photovoltaic at the summer ...

## 18650 storage in cold winter

18650 storage in cold winter. Thread starter kje; Start date Dec 12, 2022; ALL NEW - Battery Finder Search for 12/24/36/48v or by capacity but depending on the kind of electrolyte and added compounds to increase cycle-life and stability - it will vary of course. Best temp. to keep them would be just above 0 deg. C, in a cold cellar

**(GER) FREE 40x 18650 Self discharging but good capacity**

Greetings, Ive got 40x Sony VC7 cells from an ebike pack which was drained by a faulty BMS. The cells were sitting at close to 0V, clearly for a while. Managed to charge them back up carefully at 25mA and have cycled them 4x since. They are coming out at approx 3000mAh on the OPUS at 1A. They

## 18650 vs other cells?

Regular 18650's won't discharge as much as  
Vape batteries, and that's actually a good thing.  
When you have 100 cells in parallel, you can  
easily hit 100A with 'old crap' @1A each. With  
Vape batteries, that could be 2000A which is  
overkill and I'm guessing that Vape batteries  
don't last as long as 18650's but I could be  
wrong.

## 18650 parallel cell matching , Second Life Storage & Solar

This is the method I used for my second ebike battery. and all the Samsung ICR 18650 26F cells were all in one parallel group. all cells were above 2000mah, although that was all I had guaranteed. Some cells were 2200mah, 2300mah, a few 2500mah. My theory goes that each parallel pack will only charge to what it will take in, and then they

## NEED HELP TESTING 15000 18650 IN 2 WEEKS , Second Life Storage ...

Obviously testing 15000 18650 cells in 14 days presents quite a challenge. That's 1072 cells a day. Lets take an average capacity cell of 2600mAh and depending on the SOC it is in and the max charge rate of 1A that cell requires at least ?2.5 hrs to charge. then depending on the max discharge rate of say again 1A another ? 2.5 hrs not considering the ...

## FST 18650-2200mAh Cell Specifications

I have two cells like these, marked "18650 7K41814 35037" and "18650 7K41814 35043" above the barcode, CJ beneath it. Both came from the same laptop battery pack that my cousin tore apart. Thanks for the info! I've been looking for a couple hours now.
