Secure and Protect Critical Infrastructure with Customized Utility

Recently, the utilities industry has faced a number of security threats, such as cyber

attacks, physical attacks, and insider threats. These threats can cause disruptions to essential services and potentially harm the public. Organizations responsible for building and maintaining critical infrastructure face the challenge of securing their facilities from these cyber ...

Securing the future of energy transition: Cybersecurity in the Energy ...

Q: How should security risks in the energy supply chain managed? RS: An approach that could be incorporated is the leveraging of the Digital Bill of Materials (DBOM). This could provide the necessary transparency for organisations that are involved with CNI, but this could and should be applied more broadly to ensure best practice across the board.
