Overview

What does the Seychelles government do?

The Seychelles Government is committed to providing adequate, reliable and affordable energy to meet future energy consumption needs and to underpin strong economic growth through consumable energy initiatives. The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as wind and solar.

What is a people-centred energy transition in Seychelles?

An exciting people-centred energy transition is underway in Seychelles, an archipelago of 115 islands off East Africa in the Indian Ocean. Spearheaded by the Seychelles Energy Commission, the PV democratisation 2.0 project is the recipient of the Climate Investment Platform's Thomas Jensen Energy Transition Award.

How is electricity produced in Seychelles?

Electricity for the island nation of Seychelles is primarily produced by diesel generators which must import their fuel (69 MW on Mahe and 12 MW on Praslin). Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated.

What is Seychelles' energy policy?

Energy policy calls for 15% renewables by 2030. In June 2013, the first wind farm in Seychelles was officially inaugurated. This 6 MW power plant can produce up to 2% of the Seychelles' power and is located on Mahé Island. It is expected that the wind farm will replace 1.6 million litres of diesel fuel annually.

What is a 100% renewable Seychelles?

A 100% renewable Seychelles – A plan to change the Seychelles' power supply to 100% renewables, its costs and possible benefits. Centre for Sustainable

Energy Systems (CSES/ZNES), System Integration Department. Report 1: Mahé, and Report 2: Praslin and La Digue. International Monetary Fund (IMF). (2017a).

Is biomass a source of electricity in Seychelles?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Seychelles: How much of the country’s electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.

Seychelles centric energy

Seychelles: Wind farm starts up , African Energy

Abu Dhabi-based renewable energy developer Masdar has started up the 6MW Port Victoria Wind Power Project, the Seychelles' first large-scale, renewable energy project. It accounts for more than 8% of the grid capacity on the archipelago's main island of Mahe, where 90% of the country's residents live.
