

## European Solar Energy Storage

# Simco power unit Palau

## Overview

---

What type of power supply does Simco-ion use?

The N167 (120V) and N267 (230V) are Simco-Ion's most versatile power supplies. They can be used with several shockless static bar models (R50 Bar and MEB Bar). A terminal block connector inside the power supply allows for the connection of up to four static eliminators to one power supply. The units accept either shielded or unshielded cable.

Which Simco Ion power supply is best?

The F167 (120V) and F267 (230V) are among Simco-Ion's most popular power supplies. They can power a variety of shockless static eliminators, including the HS Nozzles (up to 100 nozzles), and MEB Bars. The units' compact size and budget friendly price make them customer favorites. UL, CSA and CE approved.

Which Simco-Ion power supply is CE approved?

CE approved. The N167 (120V) and N267 (230V) are Simco-Ion's most versatile power supplies. They can be used with several shockless static bar models (R50 Bar and MEB Bar). A terminal block connector inside the power supply allows for the connection of up to four static eliminators to one power supply.

What is SPECI Simco-ion Chargemaster VCM?

Speci Simco-Ion's Chargemaster VCM is programmable for either voltage or current control mode to supply the high voltage for charging bars and various charging applicators used to electrostatically bond materials.

Does Simco-ion use a vacuum collector?

Simco-Ion's Mark I uses a high pressure low volume vacuum collector to remove particulate down to 20 microns in size from webs and sheets. Typical models include brushes and static bars before and after the vacuum slot.
