You can charge your phone by plugging in using a cable or by placing it on the charging pad embedded into the bench itself, as well as blast music from your phone via the bench's built-in speakers by connecting to it via Bluetooth!.

Multi-functional solar panel with USB port can charge your various mobile phones or other electronic devices. Safe, reliable, and energy-saving monocrystalline silicon solar cell can give you a wonderful new charging experience.

Singapore solar panel that can charge phone

Using a solar panel to charge a power bank : r/batteries

Here are the specs for both the solar panel and the power bank. I'm no solar charger expert and a few doubts on the design of such system came to my mind: The power bank can draw up to 20W (depending on voltage) while the solar panel can output 5W at maximum. Is this a problem or it will just take more time to charge?
