## Papua New Guinea Issues and Options in the Energy Sector

The energy sector of Papua New Guinea exhibits several dominant features that influence the formulation of an energy strategy: (i) PNG is richly endowed with energy resources, such as substantial reserves of oil and gas, ample hydro potential, geothermal potential, and a large supply of biomass. This is in stark

## Papua New Guinea: CO2 Country Profile

Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product. It effectively measures how efficiently a country uses energy to produce a given amount of economic output. A lower energy intensity means it needs less energy per unit of GDP.

## Harnessing the power of renewable energy , United Nations ...

The Government of Papua New Guinea has set a target of connecting 70% of Papua New Guinea's

population to renewable electricity by 2030. By 2050, the Government hopes to have reached universal electricity access throughout the country. UNDP hopes to contribute to this aim through its various initiatives in the country.
