Going off-grid in New Zealand with solar power represents both an exciting opportunity for energy independence, a cheaper operational cost of living, and a material contribution to sustainable energy generation. This comprehensive guide will help you understand how off-grid solar works — and what.

Our off-grid solar packages include everything you need to go off the grid in New Zealand: solar panels, batteries, charge controllers, inverters, cables, and DIY-friendly manuals backed by our lifetime support. Browse through our series below. Each of our off-grid solar system includes everything.

Prices Slashed on Selected Off-Grid Systems. Limited Time Our new ULTRA off grid solar systems using the latest technology are made in New Zealand and priced from \$15,995 inc GST. The base system sizes below are a guideline only. Additional panels and battery modules can be added to each base.

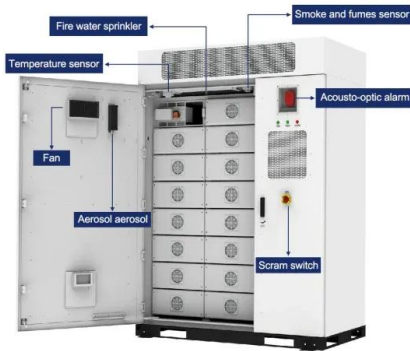

Therefore, Portable Dwellings keeps it simple with transparent pricing, practical system advice, and a guided setup from quote to handover. We design homes and solar together, so the system matches your lifestyle rather than being an afterthought. Moreover, you'll know exactly what's included and.

Off-grid solar systems typically come with a heftier upfront price tag, often

costing two to three times more than a grid-connected setup. Why?

To ensure 24/7 reliability without the safety net of the grid, an off-grid system needs to be much larger than a grid connect system, i.e. more solar.
