At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects—all while reducing.

At Modbox, we design and build shipping container solar solutions to securely house your solar panels, batteries, inverters, and other equipment. Whether you're powering a remote worksite, an off-grid project, or a backup energy system, our containers are built tough for Australian conditions.

A Containerised Off-Grid System comes with up to 107kW of solar panels on SMA TriPower solar inverter (s), up to 320kWh of Lithium batteries and up to 12 x SMA Sunny Sunny Island battery inverter/charger. These are configured as 3 phase systems inside an air-conditioned and insulated shipping.

Our offgrid solar containers are designed to be a portable system to enable power on site quickly and easily. If you are using the container as a permanent power supply, an electrician will be required to install suitable earthing & testing Our offgrid shipping containers are a self contained.

The final cost of a solar container system is more than putting panels in a box. This is what you're really paying for: Solar panels: Mono or poly crystalline material quality, wattage size, and efficiency influence cost. Battery storage: Lithium-ion vs. lead-acid significantly impacts cost and.

Fleet Containers is a leading provider of innovative solutions for shipping containers, and we are proud to offer shipping container solar panels to harness the power of renewable energy. We understand the growing importance of sustainability and the need for eco-friendly solutions in various.
