Finland advances in renewable energy investment ranking

Charpentier believes that Finland will continue to develop new forms of renewable energy such as hydrogen, solar energy and offshore wind. "Ambitious climate targets and investment in

new technologies are Finland's strong suite and I believe these factors will further increase interest among foreign investors", Charpentier concludes.

Invest in solar power and a fossil-free future.

For example, in Southern Finland, the estimated output for a 1 kWp i.e. kilowatt peak solar power solution is approximately 800-1000 kWh and in Northern Finland about 700-900 kWh per year. The output of a solar power solution is affected by, among other things, the amount of radiation, the temperature and cleanliness of the panels, the
