Solar homes Congo Republic

Solar

Overview

Could solar power be the future of energy in Congo?

Congo is one of the top five oil producers in Sub-Saharan Africa. But despite its rich energy resources, the electrification rate is low, especially in rural areas, mainly because of a lack of electricity infrastructure. But solar power could be the future as it is also said to be cheaper for households.

Does the Democratic Republic of Congo have electricity?

Select Page THE DEMOCRATIC REPUBLIC OF CONGO The Democratic Republic of Congo (DRC) is the largest country in Sub-Saharan Africa, with the same footprint as Western Europe. However, much of the DRC's large population lack access to electricity — and, like most of the countries in Africa, renewables are the only viable way to rectify this issue.

How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gW of solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

What is Kinshasa Solar City?

A 600MW PV plant known as Kinshasa Solar City situated in Menkao also entered construction in August 2023, with the potential to be extended to a capacity of 100MWp.
