Can liquid-cooled battery energy storage systems be used in solar-storage projects?

Sungrow is co-hosting a webinar with PV Tech on the subject of using liquid-cooled battery energy storage systems in solar-storage projects. To learn more about the webinar and to register, [click here](#).

What is a solar inverter?

The solar inverter is mainly a solar panel that receives solar energy and then converts it into electric energy through an inverter. Generally, only those areas with abundant sunshine will recommend solar power generation equipment.

Do solar PV inverters need a manual shutdown?

Solar pv inverters generally have automatic protection for off-circuit, over-current, over-voltage, over-heating, etc., so when these phenomena occur, no manual shutdown is required. The protection points for automatic protection are generally set at the factory and no further adjustment is required.
