

European Solar Energy Storage

Solar program registration New Zealand

Overview

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

How much solar power does New Zealand have?

There is currently around 270 MW of installed solar generation in New Zealand. This adds up to about the same capacity of a coal or gas fired Rankine generation unit. Out of the 270 MW of solar, about 180 MW is in the North Island and is mostly made up of rooftop solar installations.

How many solar installations are there in New Zealand in 2022?

In 2022, New Zealand had a record amount of distributed solar generation installed (68 MW). In the first few months of 2023, the rate of installation growth slowed somewhat.¹ However, distributed solar installations are expected to increase, with Transpower forecasting 535 MW by 2030.

What are the different types of distributed solar generation in New Zealand?

This generation is usually used at or near where it is produced. Other types of distributed generation in New Zealand include small hydro generation schemes, geothermal, small wind farms, and generation produced from industrial processes. In 2022, New Zealand had a record amount of distributed solar generation installed (68 MW).

Should you install solar panels in New Zealand?

There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills. By generating your own electricity, you can reduce or even eliminate your monthly electricity costs.

Are solar farms coming to New Zealand?

Distributed solar generation is expected to keep increasing, and New Zealand also now has some grid connected solar farm projects under construction, with more in the pipeline. The first large solar farm is expected to be completed this year.
