

## European Solar Energy Storage

# Solar system Bulgaria

## Overview

---

How big is Bulgaria's solar power?

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as major facilities come online, and there is more in the pipeline.

What percentage of Bulgaria's electricity is generated by solar power?

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity generation.

What should Bulgaria do about solar energy?

The authorities in Bulgaria need to take steps to systematically reduce barriers, fees, and surcharges on small and medium-sized solar PV systems, make it easier to connect to the grid and export the surplus electricity, and create a comprehensive policy and regulatory environment to catalyse investments.

Does Bulgaria have a solar power plant?

In April 2023 Bulgaria's Inercom signed contract with Huasun for supply of 1.5GW solar modules. Solar power in Bulgaria has expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold for \$0.30/kWh in a fixed rate 20 year power purchase agreement.

When will Bulgaria's largest solar power plant be built?

Works on the photovoltaic plant, developed by Eurohold, started in September. The construction of Bulgaria's largest solar power plant is due to be completed by spring 2023. The facility will generate green electricity with a

peak capacity of 124 MW. The project for another segment, of 50 MW, is under development.

How are solar PV projects promoted in Bulgaria?

Large-scale, commercial and industrial PV projects in Bulgaria are promoted through premium agreements. All solar PV plants with capacity of 4 MW and higher can apply for them. Premium agreements are concluded with the Energy Security System Fund (ESSF). RES producers also sign contracts with the National Electricity Company (NEK).
