Can solar power a cell phone in Nigeria?

With the Nigerian grid providing only a fraction of the electricity that people need, some employ a solar solution that provides at least some power. Micro-solar systems that power only lights and perhaps charge a cell phone tripled from 2016 to 2023, according to GOGLA, an off-grid energy industry association.

Why did a solar deal not close in Nigeria?

But Nigeria has high interest rates and is considered a financially problematic place to do business and the deal never closed. As the solar industry matured and prices dropped, the government tried to get out of an agreement to pay what it viewed as too high a price for solar power.
