

## European Solar Energy Storage

# Solar today Botswana

## Overview

---

Does Botswana have solar energy?

Botswana has abundant solar energy resources, receiving over 3,200 hours of sunshine per year with an average insolation on a horizontal surface of 21MJ/m<sup>2</sup>, one of the highest rates of insolation in the world. It is essential to take advantage of the abundance of this resource.

What is the role of solar energy in development in Botswana?

Role of solar energy in development in Botswana 181 Water Affairs (MMRWA), which is responsible for all energy matters in the country, is actively engaged in assessing the potential of and paving the path for a larger use of solar and other renewable energies.

Which solar still is best suited for Botswana?

After years of research and development activities, the RIIC findings concluded that the Mexican and brick solar stills are the best suited for application in Botswana. The Mexican still consists of a moulded fibreglass basin of 1.6 m<sup>2</sup> base area to hold saline water and has gutters on two sides to collect the distillate.

Who is sinotswana green energy?

The agreement is in place between Botswana Power and Sinotswana Green Energy, a consortium of Chinese and Botswana companies, jointly established by China Habor Engineering Co., China International Water and Electric Corp., and New Energy Company Proprietary Ltd., a local company. A tender for the project took place last year.

How many villages in Botswana have been electrified?

This project marks another significant milestone in our national development commitments," Masisi said, adding that to date, 460 out of 565 villages in Botswana have been electrified, equating to 81% of rural electrification.

Botswana's Integrated Resource Plan seeks to secure 200 MW from renewable energy sources by 2030.
