Solar turbines incorporated Burundi

APPLICATION SCENARIOS

Overview

Solar Turbines Incorporated, a wholly owned subsidiary of , designs and manufactures industrial for onshore and offshore electrical power generation, for marine propulsion and for producing, processing and transporting natural gas and oil. The company traces its history to the 1927 founding of the Prudden-San Dieg.

Who makes Solar Turbines?

Solar Turbines Incorporated, a wholly owned subsidiary of Caterpillar Inc., designs and manufactures industrial gas turbines for onshore and offshore electrical power generation, for marine propulsion and for producing, processing and transporting natural gas and oil.

What are Solar Turbines products?

Solar Turbines' products include gas turbine engines (rated from 1,590 to 52,500 horsepower), gas compressors, and gas turbine-powered compressor sets, mechanical-drive packages and generator sets (ranging from 1 to 39 megawatts).

How many Solar Turbines are there?

Solar Turbine Incorporated's product line currently consists of the Saturn, Centaur, Mercury, Taurus, Mars and Titan turbines, and a variety of attachments that are sold with them. To date, Solar has sold more than 15,000 gas turbine systems, with a combined operating history of over 2 billion hours of use, equivalent to over 100,000 years.

Why are Solar Turbines important?

Products from Solar Turbines play an important role in the development of oil, natural gas and power generation projects around the world.

How many solar gas turbine models are there?

Solar launches three new gas turbine models in the late 80s and early 90s: Taurus™ 60, Taurus™ 70, Mars® 100. All three models each have more than

1000 installations and today are part of Solar's core product lineup.

When did Solar Turbines start?

Solar Turbines started as an aircraft company in 1927. The company grew through several wars and the Great Depression. Solar's growth led the company to develop a wide range of innovative products.
