

European Solar Energy Storage

Solar turbines san diego Guinea-Bissau

Overview

Solar Turbines traces its roots to the Prudden-San Diego Airplane Company, a partnership founded in 1927 between George Prudden and seven area businessmen. Due to differences in management philosophy between Prudden and his investors, Prudden left the company in November 1928.

Who makes Solar Turbines?

Powering the future through innovative, sustainable energy solutions. Solar Turbines Incorporated, headquartered in San Diego, California, is a wholly owned subsidiary of Caterpillar Inc. Solar manufactures the world's most widely used family of mid-sized industrial gas turbines, ranging from 1 to 39 megawatts.

When did Solar Turbines start?

Solar Turbines started as an aircraft company in 1927. The company grew through several wars and the Great Depression. Solar's growth led the company to develop a wide range of innovative products.

Can Solar Turbines improve fuel economy?

Solar Turbines Incorporated has also been involved in a number of projects to improve the fuel economy of industrial turbines of all sorts. In 1992, Solar Turbines introduced the SoLoNOx system. The SoLoNOx system uses lean-burn technologies to reduce NOx emissions.

What is a solar turbine used for?

Turbines are used in production, processing and pipeline transmission of natural gas and crude oil, and generation of electricity and thermal energy for processing applications, such as manufacturing chemicals, pharmaceuticals, and food products. Solar provides lifecycle service and support.

How many solar gas turbine models are there?

Solar launches three new gas turbine models in the late 80s and early 90s: Taurus™ 60, Taurus™ 70, Mars® 100. All three models each have more than

1000 installations and today are part of Solar's core product lineup.

How many Solar Turbines are there?

Solar Turbine Incorporated's product line currently consists of the Saturn, Centaur, Mercury, Taurus, Mars and Titan turbines, and a variety of attachments that are sold with them. To date, Solar has sold more than 15,000 gas turbine systems, with a combined operating history of over 2 billion hours of use, equivalent to over 100,000 years.
