

European Solar Energy Storage

South Africa solarcentury africa

Overview

What is Solarcentury Africa?

We've been part of the rapid evolution that has made solar photovoltaic (PV) the mainstream energy source that it is today. In sub-Saharan Africa, Solarcentury Africa is a market leader in the development of solar PV and storage projects using smart energy technology and controls.

What does Solarcentury do in South Africa?

Our East Africa projects showcase our African experience, knowledge and expertise across a range of solar applications, including pioneering hybrid and off-grid systems. Solarcentury has been active in South Africa since 2013, originally focused on rooftop projects.

What is Solarcentury Africa & Sino energy doing?

Solarcentury Africa and Sino Energy achieves Financial Close on t. The 20 MWp solar PV plant will be the first fully merchant independent power producer trading all of its renewable power. Solarcentury Africa achieves financial close on a 14 MWh battery.

Does BB energy own Solarcentury Africa?

Since BB Energy acquired Solarcentury Africa in March 2021 it has become a key part of BB Energy's renewable ambition. Solarcentury Africa's integrated business model means it builds, owns and operates solar projects as well as managing the financial and commercial stages such as equity, debt, power purchase agreements and energy management.

Can solar power improve Africa's power capacity?

We speak to Jason De Carteret, Head of Solarcentury Africa, about harnessing the sun's energy to enhance the continent's power capacity and find greener solutions. Solar power in Africa has become increasingly popular as a renewable energy source.

Does Solarcentury Africa have a multi-megawatt project?

To date, Solarcentury Africa has developed, designed, installed and delivered multi-megawatt projects across several African countries. In October 2023, Solarcentury Africa completed its 11.25 MWp solar and 8.5 MWh battery hybrid system at the Balama Graphite Mine in Mozambique.
