## South Korea aggreko ets

## Overview

---

South Korea's Emissions Trading Scheme (KETS) is the second largest in scale after the EU ETS and was launched on January 1, 2015. South Korea is the second country in Asia to initiate a nationwide ETS. Complying to the country's pledge made at the COP15 of 2009, the South Korean government aims to reduce its greenhouse gas (GHG) emissions by 30% below its business as usual scenario by 2030.

What does ETS stand for in South Korea?

South Korea approves initial wave of reforms. On 24 November 2022, the South Korean Ministry of Environment released a document outlining the first of several near-term reforms to its domestic emissions trading system (ETS) as part of ongoing efforts to improve its overall effectiveness.

Does South Korea have an emissions trading system?

In April 2011, the South Korean government released its final draft for an emissions trading system, modeled on the EU ETS, that outlines a three-phase program. This program, however, is not limited to a ten-year term of operation.

How does ETS work in South Korea?

**COST CONTAINMENT/VOLATILITY MANAGEMENT:** South Korea's ETS gives the government the ability to increase the supply of allowances if prices rise too high. Specifically, the government has the power to hold an early auction(s) for up to 25% of reserve permits in order to contain prices.

What is the emissions cap in South Korea?

The South Korean government had set the emissions cap for the first year of implementation (2015) as 573 MtCO<sub>2</sub>e. The major objectives of the KETS is to place South Korea at the forefront of the global effort in reducing GHG emissions and to develop its market competitiveness in the clean energy sector.
