

## European Solar Energy Storage

# South Sudan solenco power

## Overview

---

Who is solenco?

Solenco is a fast-growing Belgian SME innovator in the field of cleantech and specializes in hydrogen energy storage systems for residential, commercial and industrial installations. Why hydrogen?

Hydrogen has the unique capacity to store energy for days, but also weeks and even entire seasons.

Can South Sudan generate electricity from hydropower?

South Sudan holds the potential to generate over 2,500 MW of electricity from hydropower, mostly in its equatorial region. Fula, Shukoli, Lakki, and Bedden are among the largest project sites that have been identified on the Nile River with the potential to be developed and are estimated to generate 2,927 MW of power.

Why should you choose solenco?

Hydrogen can do that. At Solenco we believe in the power of green hydrogen to bring us to a sustainable solution for our energy demands. Only oxygen as side product, no CO<sub>2</sub> emission ! Solenco specializes in hydrogen energy storage systems for residential, commercial & industrial installations. With Solenco we go for endless renewable energy!.

How can South Sudan increase electricity access?

In a bid to increase electricity access in South Sudan, State company South Sudan Electricity Corporation plans to develop a 120 MW hydropower plant and to roll out planned regional interconnection transmission line projects.

Will South Sudan benefit from Ethiopia's diversified off-grid power system?

As a member of the Eastern Africa Power Pool – a collaborative effort by 13 east African countries to interconnect their power grids and facilitate efficient

trade of electricity among its member states – South Sudan will benefit from co-member Ethiopia’s diversified, off-grid power systems.

How much power does South Sudan need?

Meanwhile, with an installed capacity of approximately 130 MW, the majority of which is used to supply power to the country’s extensive oil fields, South Sudan is currently evaluating ways to meet its power demand of 300 MW by way of renewable energy prospects.
