

## European Solar Energy Storage

# Southern europe energy storage subsidy policy

## Overview

---

How will the European Commission support large-scale energy storage in Spain?

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed alongside renewable energy facilities, and storage planned as part of thermal power plants.

What are EU energy storage initiatives?

EU energy storage initiatives are a key part of advancing energy security and the transition toward a carbon-neutral economy, improving energy efficiency, and integrating renewable energy sources into electricity systems, and can play an integral role in balancing power grids and saving surplus energy.

Why is energy storage important in the EU?

It can also facilitate the electrification of different economic sectors, notably buildings and transport. The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

How are fossil subsidies affecting energy prices in Europe?

in which subsidy measures were one of the primary tools to counteract the effects of high energy prices on households and European industries. As a

result, fossil subsidies more than doubled between 2021 and 2022, from EUR 60 bn to EUR 136 bn, and decreased in 2023, by -16%, to EUR 111 bn.  
Support directe.

How can fossil fuel subsidies help the EU?

fossil fuel subsidies. Spending public funds on incentives that go against the transition will slow down the transition and make it more costly. Energy savings and reduced reliance on fossil fuels in the residential, power, transport and industrial sectors should help the EU in a variety of way

## Southern Europe energy storage subsidy policy

---

### The latest European energy storage subsidy policy

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country.

### Energy storage

The main energy storage method in the EU is by far 'pumped hydro' storage, but battery storage projects are rising. A variety of new technologies to store energy are also rapidly developing and becoming increasingly market-competitive.

### European energy storage subsidy policy

Policy support for battery energy storage is gaining momentum across Europe as national governments remove regulatory barriers and the EU pledges financial support for this emerging technology.

### New Subsidy schemes for Battery Energy Storage ...

These two subsidy schemes, now under

legislative review, include PLN 4 billion (MF) and, respectively, EUR200 million (RRP) budgets to aid businesses investing in lithium-ion technology energy storage and grid ...

## Changes in European energy storage subsidies (2025)

In Europe, government subsidies have historically been a key driver for the growth of energy storage technologies. However, as of 2025, there are notable changes in these subsidy schemes, which are reshaping the industry landscape.

## Energy Storage Legislation Updates in the European ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

## Energy Storage Legislation Updates in the European Union and ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

## REPORT FROM THE COMMISSION TO THE EUROPEAN ...

2023, the total amount of environmentally harmful energy subsidies (4) in the EU-27 is estimated at EUR 136 bn, 38% of total energy subsidies. The biggest share of harmful subsidies (EUR 93 bn or 68%) is linked to fossil fuels and phasing out these subsidies would free up ...

## New Subsidy schemes for Battery Energy Storage Systems (BESS)

These two subsidy schemes, now under legislative review, include PLN 4 billion (MF) and, respectively, EUR200 million (RRP) budgets to aid businesses investing in lithium-ion technology energy storage and grid infrastructure, strengthening the country's energy system.

## EU approves Spain's EUR700m energy storage subsidy plan

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed alongside renewable energy facilities, and storage planned as part of thermal power plants.
