

European Solar Energy Storage

Sovereign solar Western Sahara

Overview

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

Can Morocco turn Sahara desert into a renewable powerhouse?

Morocco is racing to turn the barren Sahara desert into a renewable powerhouse. About 70 miles from Marrakesh, on the edge of the Sahara desert, thousands of mirrors are arrayed into circular patterns, focusing the sun's rays onto an 800-foot tower at their centre.

Is Western Sahara a 'question of decolonisation'?

Western Sahara is the only African territory remaining on the list. It's also the only territory where the administering power column is left blank - a footnote explains the UN considers it a "question of decolonisation which remained to be completed by the people of Western Sahara".
