St Kitts and Nevis how much solar panel

Overview

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

The Project, scheduled for completion in 2025, will provide Saint Kitts with 35.7 MW of solar capacity and 43.6 MWh of battery storage for the delivery of clean, renewable, and reliable energy for 25 years.

On successful completion of this fully integrated solar photovoltaic system and a lithium-ion battery energy storage system (BESS), the facility will supply Saint Kitts with 30% to 35% of consumers' annual electricity demand by utilizing sustainable and renewable solar energy with ZERO carbon emissions.

A New Era In Power Generation was officially established In St. Kitts and Nevis on 27th February, 2014, gear towards the transition from fossil fuels to renewable energy products with main focus on Photovoltaics and Wind powered solutions, with hopes to gradually expands to other renewable energy technologies.

For persons looking to invest in the solar panels, Dr. Browne gave some insights on the effectiveness of a 250 watt solar panel. He said, "For the average two-bedroom home a 5- kilowatt to 10-kilowatt system should be able to meet all of their energy needs, so you are talking about 10 - 20 panels."
