Store electric system Laos

Overview

Why does Laos need a electricity supply network?

With a rapidly growing economy and population, the demand for electricity in Laos is increasing, making it essential to ensure that the electricity supply network can meet these growing needs. Laos has made significant progress in expanding access to electricity in recent years.

Does Laos have electricity?

Laos has made significant progress in expanding access to electricity in recent years. In 2019, the electrification rate in Laos was 96%, up from just 16% in 1995. The country primarily relies on hydropower for electricity generation, which accounts for more than 80% of the country's installed capacity.

What is the standard voltage in Laos?

The standard voltage in Laos is 230 volts, which is the same as many countries in Europe, Asia, and Africa. However, the standard frequency in Laos is 50 Hertz, which is different from some countries that use 60 Hertz.

Do I need a transformer in Laos?

Laos uses 230 volts and 50Hz electricity, while most countries use 110-120 volts and 60Hz. Check the voltage and frequency requirements of your electronics. If your devices are dual voltage, you won't need a converter or transformer, but if not, you'll need one to avoid damaging your electronics.

What type of plug does Laos use?

Laos uses a standard voltage of 230 volts and a frequency of 50 Hz. The country primarily uses two plug types: A and C. Plug type A has two flat parallel pins, while plug type C features two round pins. It's important to note that plug type C is compatible with type A outlets, meaning that devices with a type C plug can be used in type A outlets.

Does Laos have a USB adapter?

With its comprehensive selection of plugs covering over 150 countries, including Laos, you can stay connected and powered up wherever your journey takes you. This adapter is equipped with multiple USB ports and a standard socket, allowing you to charge multiple devices simultaneously.
