Store electricity Cyprus

Overview

Is electricity available in Cyprus?

Electricity has been available in Cyprus since very early in the 20th century. It is supplied by the Electricity Authority of Cyprus (EAC). Electricity tariffs are on a scale, with higher costs per unit if customers use more than a basic amount each billing period (which is about two months).

How does electricity work in Cyprus?

Electricity in Cyprus is managed by the Electricity Authority of Cyprus. Power is primarily generated at three fuel oil-burning stations but the use of distributed renewable energy is expanding. About 97% of the primary energy use was imported in 2008.

How much does electricity cost in Cyprus?

In 2008 when Cyprus started using the euro, electricity prices were quite reasonable. The first 120 units cost €8.51 (7.09c per unit); the next 200 cost €15.74 (7.87c per unit) and so on. Sadly, there was an explosion at Zygi in July 2011, which led to the tragic loss of 12 lives. It also destroyed the island's main electricity generating source.

Energy in Cyprus

About 97% of the primary energy use was imported in 2008. [2] However, the European Union RES target (2020) for Cyprus is 13% giving Cyprus an opportunity to promote its own energy production and increase its energy independence in the near future. According to the national action plan Cyprus expects it will also meet this target.
