What is the new TerraSmart?

Fusing the history, experience, and strengths of four brands, the new Terrasmart will provide leading solar technologies and smart solutions across the project lifecycle to mitigate risks and amplify returns for solar projects of any size, type, and location.

Who is TerraSmart?

About Terrasmart Terrasmart, the renewable energy portfolio of Gibraltar (NASDAQ: ROCK) is a leading provider of solar racking technologies, electrical balance-of-system products, installation services, and project optimization software.

What does TerraSmart mean?

Terrasmart, the brand's chosen identity, comes with a dual meaning. The first is a literal translation of the name Terrasmart — earth smart — which is how the company sees solar: a smart solution, not just for customers and energy buyers, but for the planet. A smarter choice in energy for the earth.

Is TerraSmart safe?

“Working with Terrasmart has always proven to be effective in terms of maintaining a safe jobsite. Their team, from safety director to project manager, superintendents, and field personnel, all embrace the utility-scale safety requirements and are well prepared to execute thoughtfully planned solutions to build our projects.”.

What is TerraSmart's mission?

“Our mission is to power our people, partners, and the world forward,” says Ed McKiernan, President, Terrasmart. “The drive behind the new Terrasmart is to forge powerful connections, engineer solutions, and create advantages that deliver stronger outcomes for our customers’ projects and portfolios.”.

Did Gibraltar buy TerraSmart in 2021?

The company kicked off 2021 by acquiring Sunfig, a project software services company, for \$3.75 million. A short time later, Gibraltar paid \$220 million for TerraSmart, which provides screw-based, ground-mount solar racking technology, and the pieces for what would soon become the new Terrasmart were all put into place.

## Rose Acre Farms

Terrasmart was selected to design and construct a unique structure on a farm that could house multiple chickens and their eggs. The overarching goal was to create the first-ever 100% solar powered chicken farm in the U.S. The facility would help farmers increase their overall energy efficiency--ultimately reducing the costs associated with producing eggs on the islands of Hawaii.

## **Digging Deep to Preserve the Longevity of Solar · Terrasmart**

Terrasmart uses galvanized steel components to mitigate the effects of corrosion on the racking structure. Galvanized steel members are coated in a layer of zinc, which acts as a protective coating. In a situation where the steel structural member would begin to rust, the layer of ...
